

## Anesthesia 101

*Music, lyrics: Henrik Widegren*

What do they do? How does it work?  
I wonder every day  
Where did they learn? How can they cope?  
Is there a way?  
They have potions. They have charms  
It's truly magical  
The secrets of anesthesia  
Seem supernatural  
But I have studied, googled and now I understand  
This is anesthesia 101

One: Take the medium syringe with Fentanyl  
Two: The big syringe with Propofol. Sleep tight, my friend  
Three: The small syringe with Rocuronium  
Four: Intubate and then it's coffee break again

They are cool. And they rule  
When they turn on the gas  
Never far, cause they are  
Always on their butts  
If you talk too long they turn on  
The sleep machine  
They like drugs a little too much  
Especially morphine  
They can make Goliath go to sleep  
They can make the big machine go beep

*Chorus*
